

# RFQ

Streamline RFQ processing, auto  
generate purchase orders and quotes  
using

## ISI Request for Quote

**Integrates with Dynamics–GP  
Inventory, Purchase Order Processing and Sales Order Processing**

- RFQ was created by a Certified Integration Developer at ISI.
- ISI has a proven track record of supplying Companion Modules and customizations for the Microsoft Great Plains Platform.
- ISI is support oriented.
- All ISI products are programmed in Dexterity.
- ISI will customize the RFQ System to suit your business process.

sales@isiusa.com**

### How it Works

1. A Request For Quote is entered into the RFQ Entry window.
2. RFQs may be generated for multiple Vendors from this single point of entry.
3. When the vendors' responses are received, one or more vendors may be chosen for individual items in the RFQ.
4. If integrated with SOP, a SOP quote to the customer may be generated automatically from RFQ.
5. If integrated with Purchase Order, one or more Purchase Orders may be generated automatically from RFQ.
6. Reports are provided which link RFQs to Purchase Orders and Quotes.

Microsoft Dynamics-GP is a registered trademarks of Microsoft Business Solutions.
